Win a Rebreather at EuroTek.08

The Organisers of EuroTek.08 have teamed up with Ambient Pressure Diving to bring every conference delegate the amazing opportunity to win a full specification Ambient Pressure Diving Closed Circuit Rebreather! You could walk away from EuroTek.08 with a brand new APD rebreather of your choice. Up for grabs is an Inspiration Vision, an Evolution or one of the new Evolution Plus units. In addition the rebreather offered comes with all the optional extras the Winner could desire. (Please note that an untrained winner will need to obtain suitable training at their own expense from an APD Authorised Instructor >> <http://www.apdiving.com/training/instructor/> (The cost of the training is not included in the prize).

The Ambient Pressure Diving units are the World's most popular closed circuit rebreathers, having accomplished millions of dives globally. So if you would like to get your hands on one, all you need to do is buy a ticket to attend EuroTek.08 and you are automatically entered once in this exciting draw. There are no hidden surprises and no extra fees to pay. What's more, the great news is that the more you book, i.e. Weekend Pass (2 x entries), Gala Dinner Ticket (1 x entry) and two Lunch Packs (2 x entries), the more free entries you get in the Rebreather Draw, up to a maximum of five entries per delegate.

As delegate spaces are limited at EuroTek.08, tickets are on a first come, first served basis, so please don't delay in purchasing your EuroTek.08 pass >> www.eurotek.uk.com/tickets.htm

You might want to also get a ticket to the Gala Dinner www.eurotek.uk.com/banquet.htm as this Rebreather Draw will take place on the evening of Saturday 15th November at the EuroTek.08 Gala Dinner. Managing Director Martin Parker and Product Manager Nicky Finn from Ambient Pressure Diving will be on hand to draw the winner out of the hat during the Awards Ceremony.

Many of the speakers at EuroTek.08 dive their Ambient Pressure Diving rebreathers week-in, week-out. This is probably because the Vision Electronics shipped in the new Inspirations and the Evolution units whilst being incredibly sophisticated, are above all very user friendly.

Ambient Pressure Diving rebreathers are often dived beyond recreational limits, as two

EuroTek Speakers will testify. Jeff Cornish and Ric Waring have dived their units in depths beyond 150 metres / 500 feet on shipwrecks such as the RMS Carpathia.

Deep Sea Detective Richie Kohler (right) travels worldwide with his Evolution, and leading female wreck diver Teresa Telus still dives on her original classic Inspiration. Recently she took her Inspiration to Truk Lagoon to dive the deep wrecks, and she will be talking about this at EuroTek.08.

Other speakers including Dr Geraint Ffoulkes Jones, Paul Mee, Neil Plant, Woods Hole Oceanographer and Deep Sea Detectives Cameraman Evan Kovacs all dive Ambient Pressure rebreathers. In fact a fair number of serious technical divers all rely on Ambient Pressure Diving technology, including Photographers Dan Burton and Leigh Bishop, and Deep Wreck Explorer Carl Spencer.

Ambient Pressure Diving and the EuroTek.08 Organisers now give you the opportunity to join these divers and and experience the wonderful world of closed circuit diving on an APD unit.

If you have a burning question, or want to know more the Ambient Pressure Diving Team will be on hand at EuroTek.08 exhibiting their unique range of rebreathers. So why not approach them over the weekend to find out more about this well engineered range of CCR's for yourself.
